IN THE CLAIMS

Claims 1, 4, 5, 9, 10, 11, and 35 are amended herein. Claims 3, 6-8, 12-18, 25, 31-34, 36-41, 43, and 44 are canceled. Claims 45-52 are new. All pending claims and their present status are produced below.

1. (Currently Amended) [[A]] The method of claim 42, further comprising:

~~receiving, by a printer, a document having a pointer pointing to data that is not in the received document;~~

~~retrieving the data pointed to by the pointer; and~~

creating by the printer, ~~in response to retrieval of the data,~~ a printable document comprising at least a portion of the ~~retrieved data~~ set of video clips.

2. (Canceled)

3. (Canceled)

4. (Currently Amended) The method of claim [[1]] 42, further comprising creating ~~including the~~ a pointer to the selected clips published on the Internet ~~data as part of the printable document, wherein the printable document includes both the data that is not in the received document and the pointer~~.

5. (Currently Amended) The method of claim 1, further comprising ~~including~~ placing a pointer to the selected clips published on the Internet ~~bar code~~ in the printable document ~~that represents at least some of the data pointed to by the pointer, wherein the printable document includes both the data that is not in the received document and the bar code~~.

6. (Canceled)

7. (Canceled)

8. (Canceled)

9. (Currently Amended) The method of claim [[1]] 4, wherein the pointer is a World Wide Web pointer.

10. (Currently Amended) The method of claim [[1]] 4, wherein the pointer is a URL.

11. (Currently Amended) The method of claim 1, wherein the printable document includes at least one extracted key frame grab of video data pointed to by the pointer as part of the at least a portion of the set of video clips.

42. (Previously Presented) A method, comprising:

receiving, by a printer, a document comprising a video recording;

segmenting, by the printer, the video recording into a set of video clips;

providing, by the printer, a user interface allowing the user to publish selected clips of the set
of video clips;

publishing on the Internet, by the printer, and responsive to user's selection in the user interface, the selected clips.

43. (Canceled)

44. (Canceled)

45. (New) A printer, comprising:

a multimedia retrieval module for receiving a document comprising a video recording;

a multimedia analysis module for segmenting the video recording into a set of video clips;

a user interface module for providing a user interface allowing the user to publish selected clips of the set of video clips;

a media output module for publishing the selected clips on the Internet responsive to user's selection in the user interface.

46. (New) The printer of claim 45, wherein the media output module is further configured for creating a printable document comprising at least a portion of the set of video clips.

47. (New) The printer of claim 46, wherein the media output module is further configured for placing a pointer to the selected clips published on the Internet in the printable document.

48. (New) The printer of claim 46, wherein the printable document includes at least one extracted key frame as part of the at least a portion of the set of video clips.

49. (New) The printer of claim 45, further comprising:

processing logic for creating a pointer to the selected clips published on the Internet.

50. (New) The printer of claim 49, wherein the pointer is a World Wide Web pointer.

51. (New) The printer of claim 49, wherein the pointer is a URL.

52. (New) The printer of claim 45, further comprising:

a storage module for storing at least a portion of the set of video clips; and

wherein the multimedia retrieval module is further configured for accessing the at least a
portion of the set of video clips.
